

Prometeia Model Journey (PMJ)

An integrated solution for model risk management, governance, and validation powered by GenAI analytics

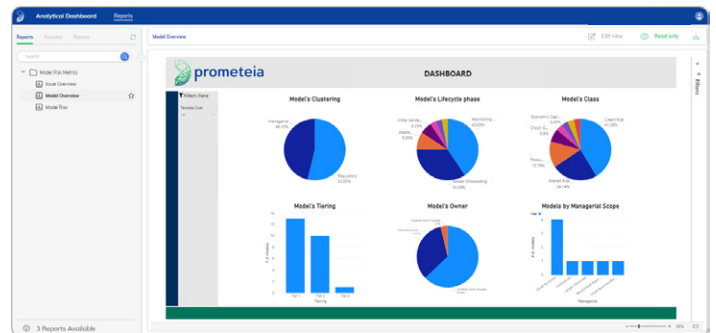

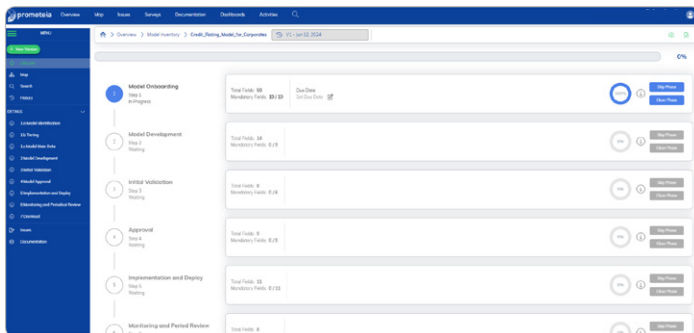

The Challenge

Financial institutions are entering a new era of model risk complexity, where growing regulatory pressure and disconnected tools slow down operations and increase risk:

- AI models require stronger validation and explainability
- New regulations demand full compliance and auditability
- Siloed, manual processes increase time and risk
- Misalignment across teams delays decisions
- AI/GenAI models raise cybersecurity concerns

The Solution

Prometeia Model Journey (PMJ) is a unique **end-to-end platform** that supports the entire model lifecycle - from development to deployment – for all model types, including AI/GenAI.

Your Concern

Our teams waste time coordinating manually.

Compliance is getting harder, and we can't afford penalties.

We are behind in AI risk and model explainability.

We need to act fast, but our systems are too rigid.

How PMJ Helps

PMJ eliminates multiple disconnected tools, replacing them with one centralized platform.

PMJ includes **built-in frameworks** aligned with Basel, ESG, and AI Act requirements.

PMJ includes **validation modules** and explainability toolkits for AI/GenAI models.

PMJ is modular, scalable, and configurable: **no coding required**.

PMJ AT A GLANCE

End-to-End Coverage

Model development, validation, approval, deployment, and monitoring within one platform.

Compliance by Design

Frameworks aligned with Basel III/IV, ESG, IFRS9, and the AI Act.

AI & GenAI-Ready

Includes tools for explainability, validation, and chatbot-guided navigation.

Zero Disruption Integration

REST APIs and third-party tool connectors ensure seamless interoperability.

Automation First

Documentation, audit trails, and reporting done in seconds, not hours.

Tailored to Local Regulations

Customizable for institutions in regions like the Middle East and Europe.

WHAT OUR CLIENTS SAY

With PMJ, we have eliminated multiple disconnected tools and streamlined our validation cycle. It's now our single source of truth for model risk.

A new system-wide bank

The ability to automate reporting and validation through PMJ has saved our team days of manual work each month. We now focus on what matters: improving model performance and reducing risk.

A UK digital challenger

PMJ's modular setup meant we didn't need to replace our existing systems. Integration was smooth, and we were up and running in record time with full regulatory alignment.

A mid-sized banking group in emerging markets

Discover how Prometeia Model Journey (PMJ) can simplify your model governance, improve collaboration, and ensure regulatory compliance without disrupting your current systems.
